Index of Subjects

α-, β-Adrenergic agonists, intramammary pressure, effect on milk flow, 411
Aspergillus oryzae, proteinase, proteolytic activity, caseins, 461

Bacillus subtilis, proteinase, proteolytic activity, caseins, 461
Blue cheese, peptides, by high performance liquid chromatography, 363

Casar de Cáceres cheese, microbial ripening, 231
Caseins, commercial proteinases, proteolytic activity, 461
  human, polyclonal antibodies, 115
  micelles, size distribution, milk, 299
  -sugar mixtures, antioxidant activity, casein and Maillard reaction products, 313
α-Casein, modification with peptidylarginine deiminase, 421
  polymorphism, goat's milk, 247
α_{s2}-Casein, disulphide-linked, purification, 187
  polymorphism, goats' milk, 247
β-Casein, derivatives, effect of alkylation, 285
κ-Casein, *N*-acetyl neuraminic acid content, 107
  micellar dissociation, heat treatment, 99
  purification, 187
Cheddar cheesemaking, cutting coagulum, speed, duration, effect on curd size and yield, 345
Cheese, CO_2 level, enzymic assay, 521
Cheese ripening, Casar de Cáceres, microbial study, 231
  enzymes, heated *Lactobacillus delbrueckii* subsp. *bulgaricus*, 469
Coagulation, acidic, casein micelles, 195
  acidification, study, 75
  milk proteins, heated, Ca activity, pH changes, on sterilization, 67
    κ-casein, micellar dissociation, 99
Colostrum, lactoferrin, isolation, ewes, 211
Condensed milk, storage, changes, 337

Dairy products, *Escherichia coli*, detection, fluorogenic method, 477
Disinfectants, resistance, milk psychrotrophic flora, 127
Dried milk, calcium ion activities, 219

Epidermal growth factor, subsequent lactation, sheep, 1
Escherichia coli, dairy products, detection, fluorogenic method, 477

Goat(s), cheese, lactococci, lactobacilli, 137
  dry period, milk yield, 13
  mammary gland, development, steroid-induced, 151

Hormones, mammary gland secretion, 171

Intestinal infections, human, oral dose, *Lactobacillus casei*, effects, 485

Kefir grains, *Lactobacillus kefiranofaciens*, isolated from fermented milk, preparation, 497
Khoa, sorption isotherms, effect of temperature, 329

La Serena cheese, characteristics, effect of vegetable, animal-rennet, 511
  lactic starter inoculation, effect of, 355
Lactation, oxytocin release, intramammary pressure, milk ejection, 159
  serum C-reactive protein, serum amyloid P, levels, 257
  xanthine oxidase/dehydrogenase, relationship, mouse, 401
Lactobacillus casei, oral dose, effect on secretory immune response, protective capacity, intestinal infections, 485
Lb. delbrueckii* subsp. *bulgaricus, enzyme system, effect of heat treatment, 469
Lb. kefiranofaciens, fermented milk, production, 497
Lactoferrin, isolation, colostrum, ewes, 211

Macropeptide, determination, chromatographic technique, 321
Mammary gland, development, effect of epidermal growth factor, sheep, 1
    steroid-induced, goat, 151
  internal pressure, α-, β-adrenergic agonists, effect of, 411
  plasma triacylglycerols, 251
  secretion, hormones in, 171
Mammogenesis, xanthine oxidase/dehydrogenase, relationship, mouse, 401
Manchego cheese, volatile components, 239
Mastitis, bacteriology, Sweden, 179
  diagnosis, markers, 389
  milk flow rate, influence, 263
    streak canal length, relationship, 383
Milk, ^{31}P nuclear magnetic resonance spectra, comparison, other species, 443
  psychrotrophic flora, disinfectants, resistance, 127
Milk composition, epidermal growth factor, effect, sheep, 1
  nutrition, model, 373
Milk flow, α-, β-adrenergic agonists, effect of, 411
Milk powder, manufacture, evaporators, performance, 29
  milk protein stability, 269
Milk protein(s), concentrates, iron content, determination, photoacoustic spectroscopy, 453
  proteose-peptone, hydrophobic fraction, purification, 85
  stability, skim milk powder, manufacture, 269

Milk quotas, investigative model, food, milk, non-milk components, 373
Milk yield, dry period, omission, between lactations, goat, 13
epidermal growth factor, effect of, sheep, 1
Milking machine, milk flow rate and mastitis, 263
liner design, effect on mouthpiece chamber vacuum, 21
MKC Fungal Protease, proteolytic activity, caseins, 461

Neutrase 0.5, proteolytic activity, caseins, 461
Nutrition, milk constituents, changes, 373

Peptides, blue cheese, 363
Proteolysis, alkylated β-casein, 285

Rennet, animal, vegetable, comparison, La Serena cheesemaking, 511
Ripening, Manchego cheese, volatile components, 239

Sheep, lactoferrin, from colostrum, 211
mammogenesis, effect of epidermal growth factor, sheep, 1
Skim milk, fermented, polysaccharide, isolation, estimation, 147
Sweden, mastitis, bacteriology, 179

Ultrafiltration, milk, membranes, inorganic, fouling, 39, 51

Whey, salted, whey protein concentrate, use, yogurt, 510
Whey protein(s), concentrate, yogurt manufacture, 510
heat treatment, amino acid availability, 431

Xanthine oxidase/dehydrogenase, mammary gland, mouse, 401

Yogurt, manufacture, whey protein concentrate, from salted whey, 510
